recordings

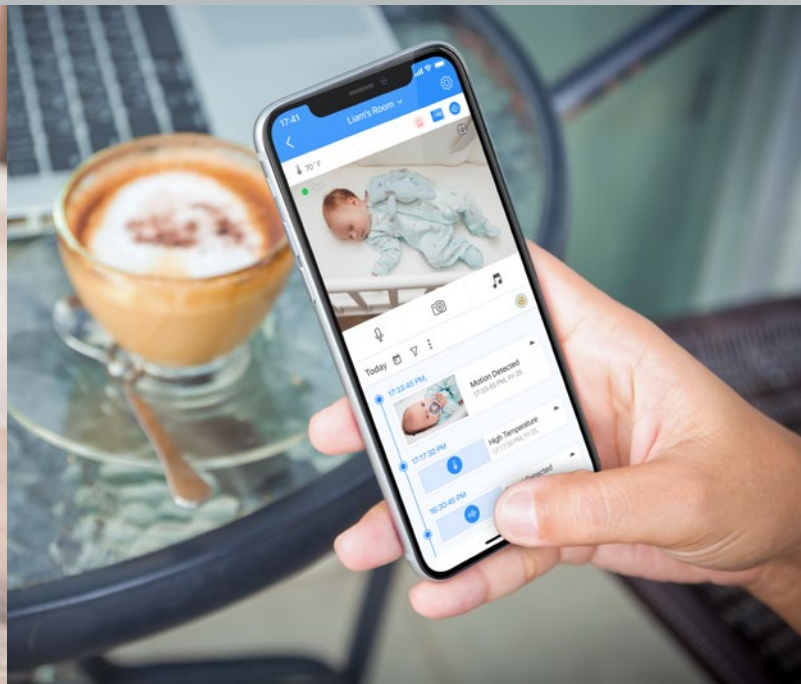

Baby tracker

Smart Schedule

Monitor What Matters.

Stay connected to your little one from anywhere with the MBP950. The crib mounts provides you with an overhead view of your baby. Monitor while at home on the 5" parent unit, or stream live in Full HD, using the Hubble Connected app when you're away. Oversee the entire room with digital pan and tilt and get a close-up view using the digital zoom. Monitor the room temperature to ensure the nursery is comfortable for your baby. Speak to and hear your little one with two-way talk and soothe them to sleep with a lullaby, soothing sound, audiobook, or personal recording. When your baby is not in their crib, simply detach the camera to use elsewhere in your home.

Quick Start Guide

(1) Requires wireless connection to the internet and a compatible viewing device.

(2) Requires Hubble subscription. Visit hubbleconnected.com/plans to find out more.

(3) On compatible viewing devices capable of displaying 1080p

(4) When there is a clear line of sight between parent unit and baby units. Any obstruction between parent and baby units will reduce the range significantly. With parent and baby units indoors, the typical range is up to 165 feet (50 meters).

(5) Operating system dependent.
