

Universal user's manual for SENCOR speakers

Safety precautions

- Do not use the speaker system consistently on maximum performance, it could cause permanently damage your hearing.
- Store recorded tapes, watches, personal cards and credit cards using magnetic coding away from the speaker system, to protect them from the magnetic poles of the speakers.

Prior to starting assembly

- We recommend you have a skilled company assemble the speakers. In case the speakers are damaged by inappropriate handling, the warranty shall lose effectiveness.
- If you are not sure of what the appropriate way of positioning the speakers would be, please contact the skilled assembly company
- Provided you will install the speakers yourself, respect the following instructions:
- firstly, measure the depth of the room, where the speakers will be installed and check whether or not another part of the automobile will be blocking them
- make sure the speaker grating does not touch any interior equipment, such as window handles, door handles etc.
- in case your intention is to install the speakers into the rear plate, check whether or not the magnet, or connectors are touching the interior part of the boot

This product fulfils all basic requirements of regulations pertaining to it.

Handling instructions for the disposal of used packaging material

Packaging material is to be deposited in the dedicated area for storing waste as specified by the village authority.

Information for the user regarding the liquidation of electric and electronic devices

The symbol marked on the product or in the accompanying documentation means that used electric or electronic devices must not be disposed of together with common waste. In order to correctly dispose of the product, dispose of it at the defined waste collection area. The correct disposal of this product will help save valuable natural resources and help in preventing the potential negative impact on the environment and human health, which could be caused as a result of improper liquidation of waste. Please ask your local authorities or the nearest waste collection centre for further details. The improper disposal of this type of waste may fall subject to national regulations for fines.

A lead-free melting-iron has been used for soldering.

Changes in parameters without notification in advance are reserved.
