IMPORTANT SAFETY INSTRUCTIONS**READ CAREFULLY AND STORE FOR FUTURE USE.**

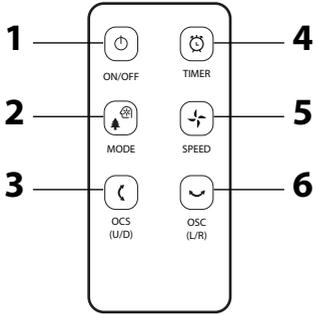

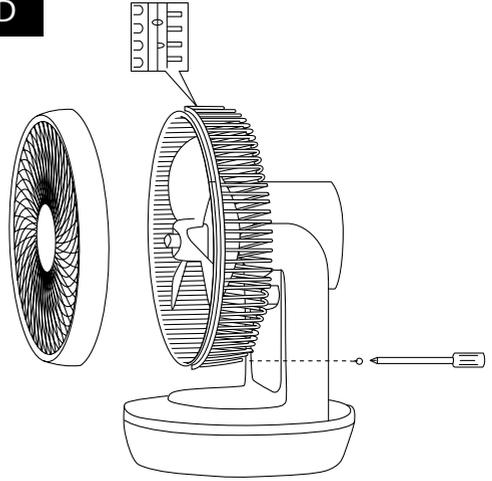

- This appliance may be used by children 8 years of age and older and by persons with physical or mental impairments or by inexperienced persons, if they are properly supervised or have been informed about how to use the product in a safe manner and understand the potential dangers.
- Children must not play with the appliance. Cleaning and maintenance performed by the user must not be performed by unsupervised children.
- In the event that the power cord is damaged, have it repaired at a professional service centre to prevent causing a dangerous situation. It is forbidden to use the appliance if it has a damaged power cord.
- The fan is not intended to be mounted on external windows or walls.
- Ensure that the fan is disconnected from the mains power supply before removing the protective grille.
- Before connecting the appliance to a power socket, check that the rated voltage on its rating label matches the electrical voltage in the power socket.
- Connect the appliance only to a properly grounded socket.
- The appliance is designed for use at home, in offices and similar types of areas. Do not use it in very dusty or humid rooms such as laundries or bathrooms, in areas where chemical or explosive substances are stored, in industrial surroundings or outdoors!
- Do not place the appliance in the vicinity of an open flame or appliances that are sources of heat.
- Prevent the fan, the power cord and the power plug from coming into contact with a hot surface.
- To prevent injury by electrical shock, do not submerge the fan, the power cord or the power plug in water or any other liquid or rinse these under running water.
- Always turn off the appliance and disconnect it from the power socket when leaving it without supervision, when not using it and before assembling, disassembling or cleaning it.
- Disconnect the appliance from the power socket by pulling on the plug, never pulling on the power cord. Otherwise, this could damage the power cord or the socket.
- Make sure that the power cord does not hang over the edge of a table or that it is not touching a hot surface. Do not place the appliance on unstable surfaces such as carpets with very long and thick fibres. Only place the the appliance on a clean, even, dry and smooth surface.
- Do not subject children, older persons or persons that are bed-bound to the effects of flowing cold air for an extended period of time.
- Do not cover the appliance with any items while it is running.
- Avoid coming into contact with the rotating parts of the appliance. Never insert your fingers or other items through the protective grille when the appliance is plugged into a power socket. This applies particularly when the appliance is in operation.
- Do not use the appliance if it is not working correctly, if it has been damaged or has been submerged in water. To avoid a hazardous situation arising, do not repair the appliance yourself or modify it in any way. Have all repairs performed at an authorised service centre. By tampering with the appliance, you risk voiding your legal rights arising from unsatisfactory performance or quality warranty.

User's manual

- Prior to using this appliance, please read the user's manual thoroughly, even in cases, when one has already familiarised themselves with previous use of similar types of appliances. Only use the appliance in the manner described in this user's manual. Keep this user's manual in a safe place where it can be easily retrieved for future use.
- We recommend saving the original cardboard box, packaging material, purchase receipt and responsibility statement of the vendor or warranty card for at least the duration of the legal liability for unsatisfactory performance or quality. In the event of transportation, we recommend that you pack the appliance in the original box from the manufacturer.

DESCRIPTION OF THE FAN

A1 Front cover	A5 Remote control storage location
A2 Fan blades	A6 Rear cover
A3 Control panel	A7 Handle
A4 Base unit	A8 Motor unit

DESCRIPTION OF THE CONTROL PANEL

B1 Display	B5 Fan speed setting button
B2 Vertical oscillation button	B6 Automatic shut-off timer setting button
B3 Operating mode selection button	B7 Horizontal oscillation button
B4 On/Off button	

DESCRIPTION OF THE REMOTE CONTROL

C1 On/Off button (ON / OFF)	C4 Automatic shut-off timer setting button (TIMER)
C2 Operating mode selection button (MODE)	C5 Fan speed setting button (SPEED)
C3 Vertical oscillation button (OSC U/D)	C6 Horizontal oscillation button (OSC L/R)

Note:
The fan is supplied assembled.

USING THE FAN

- Place the fan on a horizontal, stable, dry and smooth surface within reach of a power socket. Connect the power cord to a power socket. The fan will beep and all the indicator lights will turn on for a short moment. Then the fan will automatically switch to the stand-by mode and the room temperature will be shown on the display **B1**.

Turning the fan on and off

- While the fan is in stand-by mode, press button and the fan will start. "1" will appear on the display **B1**. Then the value "1" will stabilise and you can make personal fan settings.
- When not using the fan any more, press button and the fan will switch to the stand-by mode. Wait until the fan blades **A2** stop turning and then disconnect the power plug from the power socket.

Speed setting

- Button serves to set the air flow speed. Repeatedly press button to switch the speeds in the following order: 1 – 2 – 3. The selected speed will flash on the display **B1** for a few moments and when the value stabilises, the fan will start running at the selected speed.

Selecting an operating mode

- To select an operating mode, use button . Repeatedly press button to select the desired mode: "Natural", "Smart" or "Normal". When the operating mode "Smart" or "Natural" is selected, the indicator light above the selected operating mode will be lit. When no indicator light is lit, the "Normal" operating mode is selected.

- 1. Operating mode "Natural"** – in this operating mode the speed automatically changes from low to high and back in short time intervals.
- 2. Operating mode "Smart"** – in this operating mode the fan speed is set automatically depending on the temperature in the room.
If the temperature in the room is $\geq 35\text{ }^{\circ}\text{C}$, the fan automatically sets the highest speed.
If the temperature in the room is in the range from $29\text{ }^{\circ}\text{C}$ to $34\text{ }^{\circ}\text{C}$, the fan will automatically switch between medium speed and high speed in 15-second intervals.
If the temperature in the room is in the range from $26\text{ }^{\circ}\text{C}$ to $28\text{ }^{\circ}\text{C}$, the fan will automatically switch between medium speed and low speed in 15-second intervals.
If the temperature in the room is $\leq 25\text{ }^{\circ}\text{C}$, the fan automatically sets the low speed.
- 3. Operating mode "Normal"** – in this mode, the fan speed is set according to personal preferences.

Setting the automatic shut-off timer:

- To set the automatic shut-off timer, use button . Press button and "0" will appear on the display and the indicator light above the button will be lit. Repeatedly press button to set the time (0 hours to 8 hours), after which the fan will shut off automatically.

Setting oscillation

- The fan enables vertical and horizontal oscillation to be set concurrently.
- To set the vertical oscillation, press button . The fan will start to automatically move up and down. Press again to turn off the vertical oscillation. The fan will remain at the angle at which it was turned off.
- To set the horizontal oscillation, press button . The fan will start automatically turning left and right. Press again to turn off the horizontal oscillation. The fan will remain at the angle at which it was turned off.

Note:
If you need to set the fan to a certain position, use the vertical or horizontal oscillation button (not both) and when the fan is in the desired position, press the vertical or horizontal oscillation button. This will stop the vertical or horizontal oscillation, and the fan will be set in the desired position.

Temperature display

- The fan has a sensor that senses the ambient temperature. Temperature details are shown on display **B1** in the fan's stand-by mode.

Power-saving mode

- The fan has a power-saving mode, which dims the display **B1** approximately 15 seconds after the last setting was made. Press any button to light up the display **B1** again.

REMOTE CONTROL

Inserting and replacing batteries in the remote control

- Slide out the battery compartment from the underside side of the remote control and insert a CR2032 type 3V battery into it. When inserting the battery, heed the correct polarity.
- If the battery in the remote control is flat, replace it with a new battery of the same type.
- If you decide not to use the remote control for an extended period of time, we recommend removing the battery. If the battery were to leak into the inner area of the remote control, this could result in its damage.

Note:
Never put batteries in a fire, short circuit them or damage them in any way. Dispose of them ecologically at the end of their lifetime. Never throw batteries out with communal waste.

- The function of the buttons on the remote control and the control panel **A3** are the same. If you wish to use the remote control, point it at the control panel **A3**.

Note:
If there are obstacles located between the remote control and the control panel **A3**, the signal may not be transmitted.

CLEANING AND MAINTENANCE

- Before cleaning it, make sure that the fan is turned off and disconnected from the power socket.
- For cleaning, do not use cleaning products with an abrasive effect, solvents, etc. that could damage the appliance.

Warning:

To prevent the risk of injury by electrical shock, do not submerge the appliance, power cord or power plug in water or any other liquid.

- To clean the outer surface of the of the fan, use a clean, lightly dampened cloth. Then wipe everything so that it is thoroughly dry. Make sure that when cleaning, no water leaks into the motor unit **A8**.
- The fan blades may also be cleaned using a vacuum cleaner with a brush nozzle fitted. First it is necessary to remove the front protective grille **A1** by removing the screws located on the bottom rear edge of the fan. Then carefully turn the front cover **A1** anticlockwise. Screw out the fan blade cover in order to remove the fan blades **A2** – see figure D.

Note:
If the fan blades **A2** are excessively soiled, they can be washed in warm water with a small amount of neutral cleaning agent. Rinse and wipe dry. Before reinserting, check that the fan blades **A2** are completely dry.

STORAGE

- If you will not be using the fan for a longer period of time, store it in a clean, dry location that is out of reach of children.

TECHNICAL SPECIFICATIONS

Rated voltage.....	220–240 V ~
Rated frequency.....	50 – 60 Hz
Rated power input.....	45 W
Noise level.....	max. 53 dB (A)
Fan blade diameter.....	18 cm
Maximum air flow of the fan.....	14.62 m ³ /min
Operation value.....	0.46 (m ³ /min)/W
Maximum air flow speed.....	6.8 m/s
Standard for measuring the operating value..	IEC 60335-2-80:2015 in conjunction with IEC 60335-1:2010, COR1:2010, COR2:2011, AMD1:2013, AMD2:2016,
Contact for further information.....	FAST ČR, a.s., Cernokostecká 1621, 251 01 Říčany, Czechia

The declared noise emission level for fan model SFE 2340WH is max. 53 dB(A), which represents a level A of acoustic power with respect to a reference acoustic power of 1 pW.

We reserve the right to change text and technical specifications.

INSTRUCTIONS AND INFORMATION REGARDING THE DISPOSAL OF USED PACKAGING MATERIALS

Dispose of used packaging material at a site designated for waste in your municipality.

DISPOSAL OF USED ELECTRICAL AND ELECTRONIC EQUIPMENT

This symbol on products or original documents means that used electric or electronic products must not be added to ordinary municipal waste. For proper disposal, renewal and recycling, hand these products over to determined collection points. Alternatively, in some European Union states or other European countries you may return your appliances to the local retailer when buying an equivalent new appliance.

Correct disposal of this product helps save valuable natural resources and prevents potential negative effects on the environment and human health, which could result from improper waste disposal. Ask your local authorities or collection facility for more details.

In accordance with national regulations penalties may be imposed for the incorrect disposal of this type of waste.

For business entities in European Union states

If you want to dispose of electric or electronic devices, ask your retailer or supplier for the necessary information.

Disposal in other countries outside the European Union.

This symbol is valid in the European Union. If you wish to dispose of this product, request the necessary information about the correct disposal method from the local council or from your retailer.

This product meets all the basic requirements of EU directives related to it.
